

Soleras Advanced Coatings is a leading global provider of solutions for the deposition of thin film coatings (components, targets, coaters & software), for example energy efficient glass, thin film display, thin film PV, electrochromics, thin film battery and web coatings. Our products and solutions possess a high degree of complexity while they operate at the heart of the thin film industry. Soleras Advanced Coatings has a global manufacturing footprint with design, R&D, service, and sales organizations spread across the US, Europe and Asia. Soleras is certified in ISO 9001, ISO 14001, and ISO 18001.

#### HOW CAN YOU MAKE THE DIFFERENCE

- You are responsible for organizing and coordinating multiple simultaneous projects worldwide. You follow these projects closely in terms of technical scope, budget, timing, safety, quality, information, hygiene and environment.
- You develop independent project proposals and prepare detailed project designs with definitive specifications, project steps, timing, costs and benefits, ... in the specifications.
- You provide all involved technical and commercial information to those involved so that the production can be optimally prepared and planned. You give the necessary support at start-up.
- Within the company you are in contact with the Sales, Design, Purchase, R&D and operation department.
- You report to the Project Manager.

#### PREFERRED QUALIFICATIONS

- Master Electromechanics or equivalent, with a minimum of 5 years relevant experience.
- You can work dynamically and independently.
- You are a team player.
- You have fluent knowledge of English and/or Dutch.
- You have good knowledge of MS Office. Software knowledge of technical programs is an advantage.
- You are strong in planning, organizing and working on a project basis.
- You are prepared to make short or long trips abroad (> 30% of your time).

#### WHY SOLERAS ADVANCED COATINGS

- First and foremost, we are machine builders, sharing a passion for technology in a high-tech and dynamic environment, but above all, sharing the core belief that everyone of us – from R&D and operations to finance and marketing – contributes to making 'the difference'.
- Thanks to a great order book and technology driven products in a fast paced Industry, we are the reference in large area optical coatings.
- Products made with our equipment are part of your life on daily bases. You'll find our coatings in the windows at your home, our coatings on and in your smartphone and perhaps even in the solar panels on your roof.

#### WE OFFER

- A dynamic and technically advanced international work environment.
- Flexibility.
- Competitive remuneration with extra-legal benefits.
- Possibility of bicycle leasing through salary exchange.
