SOLERAS
advanced coatings

Soleras Advanced Coatings is a leading global provider of solutions for the deposition of thin film coatings (components, targets, coaters & software), for example energy efficient glass, thin film display, thin film PV, electrochromics, thin film battery and web coatings. Our products and solutions possess a high degree of complexity while they operate at the heart of the thin film industry. Soleras Advanced Coatings has a global manufacturing footprint with design, R&D, service, and sales organizations spread across the US, Europe and Asia. Soleras is certified in ISO 9001, ISO 14001, and ISO 18001.

HOW CAN YOU MAKE THE DIFFERENCE

- We are looking for an entrepreneurial spirit, driving our 'software project' out of the starting blocks, passionate about the challenges & opportunities to shape the fundaments of our software products, which will soon be an essential part of our product offering.
- We developed the Synaps software platform that is able to collect the data from a large coating environment and uses this data to control the complete coating environment. Check out the following link if you are eager to know more about our Synaps project: Soleras Advanced Coatings Synaps Launch - YouTube.
- As a Software developer, you will be the interface between the technical application and the core engineering/coding efforts. You collaborate with multiple stakeholders, cross-functional team members and subcontractors, to ensure that the client demands are met.
- You are responsible for creating and maintaining the backend modules which drive our platform. These are web-based modules communicating with each other over the network and are the foundation for the Frontend and Data Analytics. Some example modules: RT Control (reading and controlling devices from the machines), Historian,…

PREFERRED QUALIFICATIONS

- You have a degree in Computer Science and have a passion for software development.
- You have extensive knowledge in: C# and .NET (Core), ASP.NET, Databases (Postgres), HTTP, REST, GRPC, OAuth, CI/CD and GIT.
- You have a strong analytical brain, a positive attitude and have organizational talent to plan and coordinate your tasks autonomously.
- You are fluent in English.

WHY SOLERAS ADVANCED COATINGS

- First and foremost, we are machine builders, sharing a passion for technology in a high-tech and dynamic environment, but above all, sharing the core belief that everyone of us – from R&D and operations to finance and marketing – contributes to making 'the difference'.
- We have extensive training programs to kickstart your journey and provide a pleasant working environment focused on flexibility and little structural hierarchy.
- On top of that, Soleras Advanced Coatings is a young software company with a strong vision and the latest software packages such as Postgres, Timescale DB, Docker, Kubernetes…

WE OFFER

- International work environment.
- Flexibility.
- Competitive remuneration with extra-legal benefits.
- Attention to good work-life balance.
