

Soleras Advanced Coatings is a leading global provider of solutions for the deposition of thin film coatings (components, targets, coaters & software), for example energy efficient glass, thin film display, thin film PV, electrochromics, thin film battery and web coatings. Our products and solutions possess a high degree of complexity while they operate at the heart of the thin film industry. Soleras Advanced Coatings has a global manufacturing footprint with design, R&D, service, and sales organizations spread across the US, Europe and Asia. Soleras is certified in ISO 9001, ISO 14001, and ISO 18001.

HOW CAN YOU MAKE THE DIFFERENCE

- You analyse data of complex industrial processes with the goal of improving them.
- You master the full scope of the project, from supporting sales, brainstorming with software engineering to (on-site) commissioning,...
- We are looking for multiple profiles for different projects. Your personal passion, interests and experience will be decisive in setting the right accents and determining your personal journey.

PREFERRED QUALIFICATIONS

- You have a master's degree with a strong affinity for data analysis, software development,...
- You are committed, entrepreneurial and you always strive for the best solution.
- Experience with ETL processes is an added value.
- You can work autonomously and collaborate with your colleagues in the team.
- You are fluent in English.

WHY SOLERAS ADVANCED COATINGS

- First and foremost, we are machine builders, sharing a passion for technology in a high-tech and dynamic environment, but above all, sharing the core belief that everyone of us – from R&D and operations to finance and marketing – contributes to making 'the difference'.
- We have extensive training programs to kickstart your journey and provide a pleasant working environment focused on flexibility and little structural hierarchy.
- On top of that, Soleras Advanced Coatings is a young software company with a strong vision and the latest software packages such as Postgres, Timescale DB, MS SQL & SSIS,...

WE OFFER

- International work environment.
- Flexibility.
- Competitive remuneration with extra-legal benefits.
- Possibility of bike lease.
