

Soleras Advanced Coatings is a leading global provider of solutions for the deposition of thin film coatings (components, targets, coaters & software), for example energy efficient glass, thin film display, thin film PV, electrochromics, thin film battery and web coatings. Our products and solutions possess a high degree of complexity while they operate at the heart of the thin film industry. Soleras Advanced Coatings has a global manufacturing footprint with design, R&D, service, and sales organizations spread across the US, Europe and Asia. Soleras is certified in ISO 9001, ISO 14001, and ISO 18001.

### HOW CAN YOU MAKE THE DIFFERENCE

- You are responsible for the installation of our machines and you make the necessary practical preparations.
- You are in charge of maintenance and service interventions of machines at the customers. In case of complaints or problems, you are the one who travels to the customer to solve the problem on-site (both within and outside of Europe).
- You are responsible for the assembly of our equipment and you perform the final technical check before shipment to make sure that everything is assembled according to plan.

### PREFERRED QUALIFICATIONS

- You have a high school degree in electromechanics. Experience is an advantage but not a must.
- You have a strong technical understanding and also very good knowledge of electromechanics.
- You are eager to learn and driven to constantly update your knowledge.
- You know how to set priorities and you can work autonomously, without losing team spirit.
- You have a hands-on personality with a sense of initiative and you have a commercial/customer-oriented attitude.
- You strive to continuously improve the quality of the delivered work.
- You are willing to travel internationally on a regular basis (up to 70%).

### WHY SOLERAS ADVANCED COATINGS

- First and foremost, we are machine builders, sharing a passion for technology in a high-tech and dynamic environment, but above all, sharing the core belief that everyone of us contributes to making 'the difference'.
- We have extensive training programs to kickstart your journey and provide a pleasant working environment focused on flexibility and little structural hierarchy.
- On top of that, Soleras Advanced Coatings is a young software company with a strong vision and the latest software packages such as Postgres, Timescale DB, Docker, Kubernetes...

### WE OFFER

- International work environment.
- Flexibility.
- Competitive remuneration with extra-legal benefits.
- Attention to good work-life balance.
